Its primary implication is that the personal financial transactions of owners are kept separate from the company's financial records. Impacts how business transactions are recorded. Ensures clarity and accuracy in financial reporting. Facilitates accountability and transparency.
- 2. The Going Concern Assumption** This assumes that a business will continue to operate indefinitely unless there is evidence to the contrary. It influences asset valuation and depreciation methods. Allows for the deferral of costs over multiple periods. Supports the valuation of assets at cost rather than liquidation value.
- 3. The Monetary Unit Assumption** Financial transactions are recorded in a stable currency, typically the local currency, disregarding inflation or deflation effects. Facilitates comparability across periods and entities. Requires that only transactions measurable in monetary terms are recorded.
- 4. The Time Period Assumption** Financial statements are prepared for specific periods, such as monthly, quarterly, or annually. This allows stakeholders to assess performance over comparable intervals. Enables timely decision-making. Supports trend analysis and performance evaluation.
- 5. The Cost Principle** Assets are recorded at their original purchase cost, not current market value. This ensures objectivity and verifiability. Prevents subjective valuation. Provides consistency in asset valuation over time.
- 6. The Revenue Recognition Principle** Revenue should be recognized when earned, regardless of when cash is received. This aligns revenue recognition with the delivery of goods or services. Promotes accurate matching of revenues and expenses. Enhances the reliability of financial statements.
- 7. The Matching Principle** Expenses should be recorded in the same period as the revenues they help generate. This principle ensures a proper reflection of profitability. Improves income statement accuracy. Supports the accrual basis of accounting.
- 8. The Conservatism Principle** Accountants should choose the solution that results in less optimistic financial statements when there is uncertainty. This safeguards against overstatement of assets and income. Promotes prudence. Ensures stakeholders are not misled by inflated figures.
