Analyzing Specific Questions from June 2013

Let's explore some example questions from the June 2013 G451 paper and how their mark schemes guide responses.

Question 1: Environmental Impact of Packaging

Describe the environmental impacts of using excessive packaging.

Mark Scheme Highlights: Award marks for identifying key impacts such as increased waste, resource depletion, pollution, and landfill strain. Higher marks for detailed explanations, e.g., how packaging contributes to landfill volume and environmental degradation. Points about recycling difficulties or the use of non-renewable resources earn additional marks.

Best Student Response: >A detailed answer would mention that excessive packaging increases the amount of waste sent to landfill, which can lead to long-term soil and water contamination. It also consumes significant resources like energy and raw materials during production, contributing to resource depletion and pollution. Additionally, non-biodegradable

packaging materials may persist in the environment, harming wildlife and ecosystems. Mark Allocation: Basic points about waste and resources: 2 marks. Detailed explanation linking packaging to environmental harm: 3 marks. Use of technical terms like 'landfill', 'pollution', 'biodegradable': 1 mark. Question 2: Sustainability in Manufacturing? Explain how manufacturers can reduce their environmental impact. Mark Scheme Highlights: Recognition of strategies such as using renewable resources, reducing energy consumption, recycling, and designing for disassembly. Application of concepts like Life Cycle Assessment (LCA). Emphasis on practical measures and their environmental benefits. Ideal Student Response: >Manufacturers can reduce their environmental impact by sourcing sustainable raw materials, such as renewable resources like bamboo or recycled plastics. Implementing energy-efficient processes and using renewable energy sources like solar or wind power can significantly decrease carbon emissions. Recycling waste materials and designing products for easier disassembly promote reuse and recycling, minimizing landfill waste. Conducting Life Cycle Assessments helps identify stages where environmental impacts can be minimized, leading to more sustainable manufacturing practices. Marking Focus: Mention of specific strategies: 3-4 marks. Explanation of how these strategies benefit the environment: 2-3 marks. Use of relevant terminology and understanding of sustainability principles: 1-2 marks. Interpreting Mark Allocation and Achieving Top Scores Understanding how marks are distributed helps students tailor their responses: Partial Marks: Even if an answer isn't fully correct, including relevant points can earn partial credit. Depth of Explanation: Providing reasons, examples, or technical detail elevates responses from basic to high-scoring. Structure and Clarity: Well-organized responses with clear points and logical flow facilitate easier grading and often score higher. Tips for Students: Always read the question carefully to identify command words like 'explain', 'describe', 'evaluate', which specify what is expected. Use bullet points where appropriate but ensure explanations accompany key points. Incorporate technical terminology naturally to demonstrate understanding. Review past papers and their mark schemes to familiarize yourself with the examiner's expectations. Common Pitfalls in Interpreting the Mark Scheme While the mark scheme is a valuable guide, students should be aware of potential misunderstandings: Overlooking the Level Criteria: Focus solely on factual recall without developing explanations may limit your score. Ignoring Command Words: For example, 'explain' requires reasoning, not just stating facts. Comprehensive Review of June 2013 C1 Mark Scheme OCR The June 2013 C1 Mark Scheme OCR is an essential resource for students and educators preparing for the OCR AS Level Chemistry (C1) examination held in June 2013. This detailed review aims to dissect the mark scheme thoroughly, providing insights into its structure, marking criteria, question-specific guidance, and overall utility. Understanding the intricacies of the mark scheme not only aids effective revision but also enhances exam technique and confidence. Introduction to the OCR C1 Mark Scheme (June 2013) The OCR (Oxford, Cambridge and RSA Examinations) C1 mark scheme for June 2013 is carefully designed to evaluate students' understanding of core concepts in chemistry. C1 typically covers foundational topics such as atomic structure, bonding, periodicity, and basic organic chemistry. The mark scheme serves as an official guide, detailing what examiners are looking for in each answer and how marks are awarded. Key features include: Clear delineation of marking points for each question Breakdown of marks allocated for different parts of a question Examples of acceptable answers and common misconceptions Specific guidance on alternative correct responses Structure of the Mark Scheme Understanding the layout of the mark scheme is crucial for effective interpretation. The June 2013 OCR C1 mark scheme is organized systematically as follows: 1. Question-by-Question Breakdown Each question is numbered sequentially. Sub-questions are labeled (a), (b), (c), etc. For each sub-question, the scheme details the maximum marks available. 2. Marking Points and Criteria Marking points are explicitly listed. Each point corresponds to an element of the correct answer. Marks are awarded based on the accuracy and completeness of these points. 3. Levels of Response (if applicable) For some questions, especially those requiring explanations, a level-based marking approach may be used. Each level corresponds to the quality and depth of the response. 4. Notes and Clarifications The scheme includes notes on common errors. Clarifications help examiners distinguish between correct and partially correct responses. Key Components of the Mark Scheme To fully appreciate the mark scheme's depth, it's important to analyze its core components: 1. Explicit Marking Points The scheme meticulously lists what constitutes a correct answer. For example: When asked to explain atomic number, the scheme expects mention of the number of protons. For bonding

questions, the presence of shared electron pairs, electrostatic attraction, or the type of bond (ionic, covalent, metallic) are key.

2. Partial and Full Marks Partial marks are awarded for correct but incomplete responses. Full marks are given when all criteria are met. The scheme often specifies what partial responses are acceptable, e.g., 'if the candidate mentions 'protons' but omits 'electrons,' award partial credit.'

3. Alternative Correct Answers Recognizing multiple valid responses is vital. For numerical questions, different units or notation might be acceptable. For conceptual questions, synonyms or different phrasing might be considered correct.

4. Common Misconceptions and Errors The scheme anticipates typical mistakes, such as confusing isotopes with ions. It provides guidance on whether such errors merit marks, often awarding partial credit where appropriate.

Question-Specific Analysis A significant part of understanding the June 2013 C1 mark scheme involves examining specific questions to see how marks are allocated and what responses are expected.

Sample Question 1: Atomic Structure
Question: "State the relative charge and relative mass of a proton."
Mark scheme expectations: Charge: +1 Relative mass: 1
Marking points: Full marks awarded for both correct responses; partial for only one.

Sample Question 2: Electron Arrangement
Question: "Describe how electrons are arranged in a sodium atom."
Mark scheme expectations: 2 electrons in the first shell 8 electrons in the second shell 1 electron in the outer shell
Additional notes: A correct electron configuration (e.g., 2.8.1) earns full marks.

Sample Question 3: Bonding and Structure
Question: "Explain why sodium chloride forms a crystalline structure."
Mark scheme points: Electrostatic attraction between Na^+ and Cl^- ions Regular repeating lattice structure Strong ionic bonds leading to high melting point
Awarding marks: Full marks for detailed explanation; partial for mentioning just electrostatic attraction.

Marking of Calculations and Numerical Questions Calculations are a prominent part of C1 questions. The mark scheme provides detailed guidance on how to award marks:

Step-by-step marking: Each calculation step is evaluated individually.

Significant figures: Proper use of significant figures is required.

Unit consistency: Correct units must be used; otherwise, marks may be lost.

Common pitfalls: Incorrect use of molar masses or rounding errors are highlighted, with guidance on partial credit.

Example: For a question calculating M_r (molecular mass), if a candidate correctly sums atomic masses but makes a rounding error, partial marks are awarded based on the correctness of the calculation.

Usefulness of the Mark Scheme for Students and Teachers The June 2013 OCR C1 mark scheme is invaluable for multiple reasons:

- 1. Effective Revision Tool** Students can use it to understand what examiners are looking for. It helps identify keywords and concepts that are critical for marks.

- 3. Assessment of Practice Questions** Teachers and students can mark practice answers consistently. The scheme helps in understanding common errors and misconceptions to address.
- 4. Confidence Building** Familiarity with the mark scheme reduces anxiety. Students gain a clear idea of what is expected, leading to better performance.

Limitations and Considerations While the mark scheme is comprehensive, there are some limitations to be aware of:

Rigid marking criteria: May not account for innovative or alternative correct explanations not listed.

Potential for over-reliance: Students should also understand concepts beyond the scheme to avoid rote learning.

Examiner variability: Slight differences in marking can occur, although the scheme aims to standardize marking.

Conclusion: The Strategic Value of the

June 2013 C1 Mark Scheme OCR In summary, the June 2013 OCR C1 mark scheme is a detailed, structured, and invaluable resource for both students and teachers.
